

How to share a video in Moodle

Step 1

Go to My Videos, find the file you want the link for. For example the one the red arrow points to.

View Edit My Files My Videos Playlists

New Sorting and More

We have added new features including folder sorting. This will change the way the items are sorted on these pages, but your shared folder pages are unchanged and still sorted by title.

<p>Step 3 Scroll down to the bottom of the page, you'll see "Links & Embed". Select and copy your link.</p> <p>If you need to regenerate the URL, Select "Regenerate Secret Key for Protected video". Your old URL will then become invalid.</p>	
<p>Step 4 Open Moodle and go to your course.</p>	
<p>Step 5 Turn editing on. Then select "Add an activity or resource".</p>	

Step 6

Select "URL" from the list. Please note that there are many choices in Moodle to share a link depending on your course design, such as Label, Page, URL, New Course, etc. We will be demonstrating sharing a link of your video on a "URL".

Step 7

Enter name and description for your video.

Then paste your link on “External URL” field. Click “Save and return to course”.

The image shows a screenshot of a video configuration interface. It is divided into sections: 'General' and 'Content'. In the 'General' section, there is a 'Name*' text input field and a 'Description*' text area. A red arrow points to the 'Name*' field. Below the description area is a checkbox for 'Display description on course page'. In the 'Content' section, there is an 'External URL*' text input field and a 'Choose a link...' button. A second red arrow points to the 'External URL*' field. At the bottom of the form, there are three buttons: 'Save and return to course', 'Save and display', and 'Cancel'. The 'Save and return to course' button is highlighted.

Step 8

You will be able to watch your video when you click on the link. Please note that right-clicking the link will give you a choice of opening the video in a separate tab or window.
